

Harsh Winter, Healthy Hands

Protect hands and nails throughout the winter months with Hand Care Essentials and Dr. G's Liquid Diamond All Natural Nail Treatment and HandClens.

Just when winter is at its worst and your clients' hands bear the brunt of its blustery effects, Barielle comes to the rescue with Hand Care Essentials. Designed to keep hands and nails in flawless condition despite the chill, the five new products—Ultra Soft Hand Crème with SPF 15; Ultra Speed Dry Manicure Extender; 60 Second Manicure; Cuticle Replenisher with Mango Butter; and one of seven Fall 2006 Barielle Shades nail polishes—revive, hydrate and beautify your clients' skin and nails. **For more information on Barielle, circle 200 on the Reader Service Card, call 800/790-8884 or log on to www.barielle.com.**

Woodward Laboratories introduces two new gems in the nail industry with Dr. G's Liquid Diamond All Natural Nail Treatment and HandClens. Liquid Diamond uses natural hardeners from mimosa and myrrh plants to give natural nail clients stronger, harder nails in as few as seven days. HandClens, a foaming, alcohol-free antiseptic sanitizer, softens hands like lotion as it kills germs. **For more information on Woodward Laboratories, circle 201 on the Reader Service Card, call 949/362-4600 or log on to www.woodwardlabs.com.**

Hand Care Essentials

1 Have your client wash her hands. Place a generous amount of 60 Second Manicure on your client's hands and rub in a circular motion for up to one minute. Rinse, pat dry and continue massaging.

2 Apply Cuticle Replenisher with Mango Butter around the nail contour. Gently push back the cuticle with a cuticle stick. Remove dead tissue to form a neat line. Repeat on each nail.

3 Thoroughly massage Ultra Soft Hand Crème into the hands and arms.

4 Apply one layer of any Barielle base coat to your client's nails. Once the base coat is dry, apply two coats of the Barielle Shade of your client's choosing. Start with a stroke down the center of the nail, then go across the nail's base and down the two sides, without touching the cuticle.

5 After the nails are polished, lightly brush one coat of Ultra Speed Dry Manicure Extender over the nails and under the tips to protect the polish and add gloss.

6 Your client will rejoice over her rejuvenated hands and nails!

Dr. G's Liquid Diamond All Natural Nail Treatment and HandClens

1 Have your client rub HandClens on each hand for at least 15 seconds. Remove any nail polish from your client's natural nails. Perform a manicure on your client's nails.

2 Hold a Liquid Diamond swab with the colored ring end facing up. Bend the colored ring tip gently to one side until it snaps and releases the liquid inside. Liquid will flow down to the opposite end of the swab.

3 Brush the swab on the nail until the liquid strengthener covers the entire nail. One swab can be used for all 10 nails.

4 For the next five to seven days, the swab should be applied twice daily. For maintenance, use the product twice a week. ↓
