

# In Perfect Balance

Create beautiful nails with the Perfect System from Trind and NSI Balance UV Color Gels.

Discover a new way to give your clients an ideal service. Perfect System from Trind is a six-step approach to achieving beautiful hands, nails and cuticles in only two weeks. Face the problem of weak, peeling nails and dry hands and cuticles head-on with this treatment line, which can be used on all nail types. The system includes Trind Cuticle Remover, Cuticle Balsam, Nail Balsam, Nail Repair Strengthener, Hand Repair Cream and the Nail Magic Buffer. **For more information on Trind, circle 200 on the Reader Service Card, call 866/874-6326 or log on to [www.trindusa.com](http://www.trindusa.com).**

Your client loves a sizzling polish job on her natural nails, but she hates it when the paint starts to chip after a few days, which happens to be an unavoidable aspect of wearing nail lacquer. NSI solves your polish problems by giving you high-shine, chip-proof color that lasts for two weeks or longer with its Balance UV Color Gels. Not only will your client enjoy long-lasting color, but she'll also have the benefit of added strength to her natural nails. Plus, you can keep her on a regular two-week schedule. **For more information on NSI, circle 201 on the Reader Service Card, call 800/354-6741 or log on to [www.nsinails.com](http://www.nsinails.com).**

# Trind Perfect System

1 Gently soften cuticles with Cuticle Remover. Use an orangewood stick to push back the cuticles.

2 Hydrate the cuticles with Cuticle Balsam to support nail growth.

3 Buff the nail with the three-sided Nail Magic Buffer. Using half-round movements, start with the black side of the buffer, then use the white side. Finish with the gray side to give the nails a shine.

4 Apply Nail Balsam to moisturize and prevent the breaking and splitting of nails.

5 Strengthen the nails with a coat of Nail Repair.

6 Finish with the Hand Repair Cream.

# NSI Balance UV Gel System

**1** After thoroughly prepping the natural nail and applying NSI Acid-Free Balance Bond Primer, begin by applying NSI Balance Builder Gel in polish-like strokes from the cuticle to the free edge. Cure for 90 seconds.

**2** Apply Balance UV Color Gel to the nail and cure it for two minutes. For deeper color intensity, apply a second layer of color gel and cure for two additional minutes. Remove the tacky dispersion layer with NSI Cleanse.

**3** Apply NSI Balance Finish Clear for a high-gloss shine and cure for 90 seconds. Again, remove the tacky dispersion layer.

**4** Complete steps 1 through 3 on your client's remaining fingers for a set of strong, beautiful, gel-polished nails.
