

# Create Impressive Nails Quickly for Any Occasion

Forever French Nail Systems and Konad Stamping Nail Art

The Forever French Nail Systems acrylic system features specially formulated monomer and polymer so you can sculpt flawless pink-and-whites in a minimal amount of time. The easy-to-use product self-levels and has little odor, and the finished enhancements resist breakage and lifting. Since the system requires little nail preparation, techs can complete a full set in only 30 to 45 minutes. The introductory kit includes a 4-ounce jar of Winter White Powder, a 4-ounce jar of Impeccable Pink Powder, an 8-ounce container of Liquid Monomer, one nail file and a Super Soft Buffer. Techs can also separately purchase larger sizes of the liquid and powder, as well as extra files, buffers, bits and forms. **For more information on Forever French Nail Systems, circle 201 on the Reader Service Card, call 781/726-0361 or log on to [www.foreverfrenchnailsystems.com](http://www.foreverfrenchnailsystems.com).**

Konad makes it easy to create impressive-looking nail art with its Stamping Nail Art kits. The Professional Salon Kit includes a large assortment of items that can also be purchased separately: a total of 331 images on plates of various sizes, three nail stamps, three scrapers, two top coats, a base coat, 19 special polishes, rhinestones, cuticle oil, a buffer, tweezers, an emery board and more. All of the items are packaged in a silver butterfly-print briefcase. You can boost your profits and maximize your time by using the kit to create all of your nail art, or by using the stamps to provide a convenient add-on during regular manicure and pedicure services. With a little practice, you'll be able to stamp multicolored designs, fancy French tips and more on your clients' nails in mere minutes! **For more information on Konad, circle 200 on the Reader Service Card, call 310/635-8200 or log on to [www.konadusa.com](http://www.konadusa.com).**

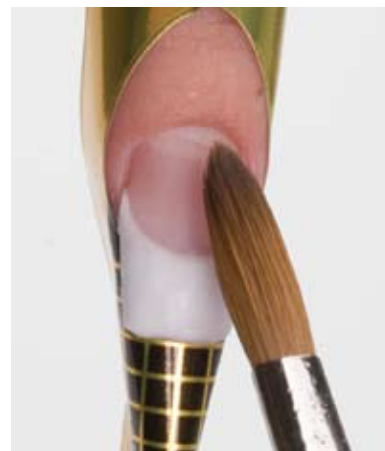

# Forever French Nail Systems

1 Prepare the natural nails for a sculpted set by lightly etching each nail and applying primer sparingly. Apply all 10 forms.

2 Using one part liquid and two parts Winter White Powder, sculpt a box on the free edge. Push the product up to the right ear and then the left ear. Make a smile line while keeping the box square.

3 Next, use the Impeccable Pink Powder in a 1-to-1 liquid-to-powder ratio and fill in the gully. Try to avoid dragging the pink over the white.

4 Using an electric file, file the nail so that the product is flush with the cuticles. Repeat on all 10 nails.

5 Using a 180-grit file, file the nails to the client's desired shape and refine the surfaces of the nails.

6 Apply cuticle oil to the nails and buff them to a shine.

# Konad Stamping Nail Art

1 Perform a manicure as usual. Apply a base coat and a base color (if desired) on all 10 nails.

2 Apply polish to the desired design on an image plate. (For multicolored nail art, apply a different shade to each section of the image plate.)

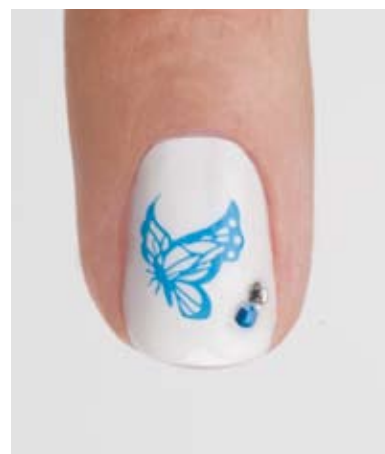

3 Run the scraper across the chosen design to remove excess polish from the image plate.

4 Quickly press a stamper onto the plate to pick up the polish design.

5 Stamp the image onto the nail with a gentle rolling motion or simply press down, depending on the size and type of design you are transferring.

6 Repeat steps 2 through 5 to add designs to other nails, cleaning the scraper, stamp and image plate with a cotton pad dipped in nail polish remover after each use. Apply top coat over each nail after the designs dry.
