

# Products for Sanitary and Soothing Pedicures

Footsiebath and Smooth Body Lines

The Footsiebath Pedicure Spa and Disposable Liner System makes providing safe and relaxing pedicures a cinch. The disposable liners are prefitted for the tub and can be easily replaced between clients. The large, deep bowl can comfortably fit feet up to men's size 13 and allows for enough room to easily wash products off the feet without spilling. Two control knobs allow you to customize the temperature and vibration settings for each client, and the vibration noise-reduction system helps maintain a relaxing salon environment. The spa also features a lightweight design and retractable cord for easy and safe transportation inside the salon or out.

Give your clients soothing spa manicures and pedicures with the Smooth Body Lines Spa Collection. The four products—Therapeutic Soak, Sea Salt Scrub, Therapeutic Moisturizing Lotion and Spray-On Skin Conditioning Oil—will leave your clients feeling relaxed, refreshed, hydrated and completely pampered. Each of the moisturizing products is available in three scents to offer a wide range of therapeutic benefits: stress-relieving, calming and healing lavender/vanilla; energizing, rejuvenating and refreshing citrus; and uplifting, stimulating and muscle tension-relieving peppermint/eucalyptus. **For more information on Smooth Body Lines, circle 201 on the Reader Service Card, call 877/673-0703 or log on to [www.smoothbodylines.com](http://www.smoothbodylines.com).**

# Footsiebath Pedicure Spa and Disposable Liner System

1 Before using the pedicure spa, ensure that the tub is clean, and then place a new liner into the tub. Pour fresh, warm water into the new liner.

2 Place the unit on the floor in front of the client. Make sure that the selector knob is turned to the "Off" position before you pull out the power cord and plug it into an outlet.

3 Next, immerse the client's sanitized feet in the water so that they rest comfortably in the tub. Select the desired operation ("Vibrate," "Heat" or "Heat + Vibrate") by turning the selector knob.

4 Add a pedicure soak to the tub if desired, and then let the client's feet soak for about 10 to 15 minutes. Apply cleanser, scrub and/or a mask to one foot while the other foot soaks. Rinse off any product in the tub.

5 When finished with the soak, turn the selector knob to "Off," unplug the unit and press the "Cord Rewind" button to retract the power cord. Remove the client's feet from the tub and complete the pedicure as usual.

6 After completing the pedicure, move the unit to a sink and dispose of the water. Remove and dispose of the used liner. Keep the spa in hygienic condition by following the cleaning and disinfecting instructions that come with the unit.

# Smooth Body Lines Spa Collection

**1** Sanitize the client's feet while she chooses her desired therapeutic scent. Pour half of a cup of the Therapeutic Soak sea salt crystals into a pedicure footbath, and let the feet soak for 10 minutes.

**2** After removing the client's feet from the footbath, proceed with your usual pedicure routine: Clip, nip, file and buff.

**3** Working in a circular motion, gently rub one scoop (about one ounce) of the Sea Salt Scrub onto the client's feet and legs to remove dead skin cells. Rinse the scrub off the skin, and pat the legs and feet dry.

**4** Next, massage a generous amount of Therapeutic Moisturizing Lotion onto the client's feet and legs.

**5** Spray the feet with Spray-On Skin Conditioning Oil, paying special attention to areas that need additional moisture, and wrap the feet in warm towels for five minutes.

**6** After removing the towels, clean any oil or lotion from the client's toenails. Finish the pedicure by applying base coat, polish and top coat.
