

# Kits for Fabulous Feet and Hands

You Switzerland One-Phase V.I.P. Gel Introductory Kit  
and Pinnacle SoHo Professional Pedicure Kit

Discover the world of gels with the You Switzerland One-Phase V.I.P. Gel Introductory Kit from Backscratchers Salon Systems. The kit contains more than enough supplies for techs to practice their techniques: V.I.P. Aqua Gel, a transparent sculpting gel that can be used alone or with You Nails Designer Gels; V.I.P. Gel Ice, a versatile UV top coat that can be applied over any enhancement to create brilliant shine; a SeptiFile Trial Pack; Nail Forms; instructions; and more. **For more information on Backscratchers Salon Systems, circle 200 on the Reader Service Card, call 800/832-5577 or log on to [www.backscratchers.com](http://www.backscratchers.com).**

The Pinnacle SoHo Professional Pedicure Kit from FPO includes the essential elements techs need to perform a pampering pedicure—all in colorful packaging and soothing scents: Clean Freak antibacterial foot spray, Totally Buff sugar and walnut exfoliating scrub, Get Smooth callus reducer, Sole Flakes milk and honey hydrating foot soak, Too Cool apple and oatmeal detoxifying foot facial, Rub Down massage and finishing cream, a Spa Rock callus smoother, a measuring scoop and an instructional DVD. **For more information on FPO, call 888/544-8214 or log on to [www.fpoproducts.com](http://www.fpoproducts.com).**

# You Switzerland One-Phase V.I.P. Gel Introductory Kit

**1** Prep as usual: Remove polish, cleanse your client's hands with Hygienic Elegance Cleansing Wash, gently push back the cuticles, shape the nails with a 240-grit file and use a 600-grit file to remove shine from the nail plate. Wipe any dust from the nails with a dry Neat & Tidy wipe.

**2** Apply a thin layer of You V.I.P. Gel Aqua over each nail, staying one-sixteenth of an inch away from the cuticles. Cure for 90 seconds under a 36-watt UV lamp (or longer when using a lamp with lower wattage). Do *not* wipe off the sticky layer.

**3** Next, apply a thin layer of You Nails Designer Gel in the color of the client's choosing, either over the entire nail or in a desired pattern. Cure under a 36-watt UV lamp for 90 seconds.

**4** Apply another thin layer of You V.I.P. Gel Aqua over each nail, paying attention to stress areas, and cure the nails under a 36-watt UV lamp for 90 seconds. (For weak or problem nails, apply and cure a third thin layer.)

**5** Remove the sticky layer with a Neat & Tidy wipe moistened with Stripr. Then, remove shine with a 240-grit file or a buffer, and clean any dust off of the nails with a dry Neat & Tidy wipe.

**6** Using a polish-like application, apply a thin layer of You V.I.P. Gel Ice on each nail, covering the entire nail and capping the free edge. Cure under a 36-watt UV lamp for 90 seconds. Finally, apply Nail Radiance Cuticle Oil to the cuticles.

# Pinnacle SoHo Professional Pedicure Kit

1 Spray the client's feet with Clean Freak to sanitize and deodorize the skin and nails.

2 Next, add one scoop of Sole Flakes to warm water before putting your client's feet in the footbath; let the feet soak for a few minutes to clean, soften and rejuvenate the skin.

3 Have the client remove her feet from the bath and, while the skin is still moist, apply Totally Buff to the feet. Rub in the product to detoxify and exfoliate the skin, and then rinse and dry the feet.

4 In a glass bowl, mix together the contents of the Too Cool liquid and powder bottles, and smooth the mixture over the feet. Let the mask sit for about eight minutes, or until it forms a rubber-like consistency. Peel off the mask and rinse and dry the feet.

5 Apply Get Smooth to any calluses and leave on for no more than five minutes. Rinse the product off the feet, and then smooth any problem areas with the Spa Rock.

6 Dry the feet and finish by applying Rub Down over the feet and legs, paying special attention to any remaining dry areas. Continue with the pedicure as usual.
