

Soothing Services

Give your clients a relaxing, waterless service with the NK EZ Way Treatment, and conclude the soothing service with Nail & Cuticle Treatments from BioCreative Labs.

Save the planet and your wallet with the NK EZ Way Treatment. This waterless service allows you to conserve water in the salon and reduce service time, giving you the opportunity to book more clients. Each treatment kit includes an individual orangewood stick and nail file to prevent contamination by fungi or bacteria, and gloves or socks that contain an exclusive emulsion to quickly soften cuticles and prep hands and feet for a soothing treatment. **For more information on Natural Kosmetics, use FreeInfo #200, call 407.656.4465 or log on to www.naturalkosmetics.com.**

Formulated with organic, age-defying argan oil from Morocco, the Nail & Cuticle Treatments from BioCreative Labs add a sense of luxury to even the most basic services. The six treatments calm and soothe the skin, and include Cuticle Remover, Basecoat, Basecoat Strengthener, Topcoat, Ultra Shine Topcoat and Cuticle Oil. **For more information on BioCreative Labs, use FreeInfo #201, call 877.909.7334 or log on to www.biocreativelabs.com.**

NK EZ Way Treatment

1 Remove polish and shape fingernails.

2 Place the glove on your client's hand. Massage the nails so the cream remains around the cuticle. Leave the glove on while repeating this step on the other hand.

3 Cut off the tip of the gloves with scissors and remove excess cream. Push back cuticles and trim away any dead skin. Repeat on the other hand.

4 Finish the manicure as usual. Continue the same steps on the feet with the emulsion socks.

BioCreative Labs Natural Nail Manicure

1 Prep and clean hands and nails.
Apply Cuticle Remover and push back cuticles.

2 Apply Basecoat or Basecoat Strengthener to nails.

3 Apply polish to nails.

4 Apply Topcoat or Ultra Shine Topcoat to nails.

5 Finish the service with Cuticle Oil. ♡
